Calgary and Canada

Calgary, if Jesus tarries, Calgary, even in one decade from now will be one of the most wealthy cities in the whole world. A business centre, and an energy centre for the world. Calgary, there will be great investments that will come into Calgary and across Saskatchewan and Alberta. There will be such huge resource energy finds that you will literally in a sense bring salvation to the United States of America. And the sister to the north will help deliver the brother to the south.

Calgary will be put on the map.

It's going to be one of the leading centers and cities that is going to have believers in all 7 cultural mountains, affecting education, affecting government, affecting the arts and entertainment. I see something new in media going to come out of Calgary.

This new woman premier just elected for Alberta is but a prophetic token because the Holy Spirit would say to you "watch out, watch out, watch out and pray. Because I am going to raise up a righteous woman who will even be prime minister of this nation.

This is not going to be a movement that is going to ebb and flow in Canada because you have turned a corner. There is going to be a movement to restore the ancient foundations. There is going to be a deliverance movement that is going to come across Canada that is going to clean the mixture of witchcraft.

The Lord showed me in a dream a few months ago, I am not saying that it is limited to this, but I saw it, I saw three nations that would have in specific, economic stability. Nations would go to learn from those countries because they would have, compared to many, many, many other nations, economic stability where other nations would not. They were Canada, South Korea and Australia. They would become models of economic prosperity when other nations shake.

The Holy Spirit spoke to me that there would be a movement of God in Canada and part of it was because of 2 reasons:

1. Because of your restoring dignity to the host First Nations peoples, and you would give them their proper place. A deliverance movement would happen amongst the Inuit, and your First Nations indigenous peoples.
2. Because you, when other nations back away, you will take a stand for Israel.
